

Flowcode

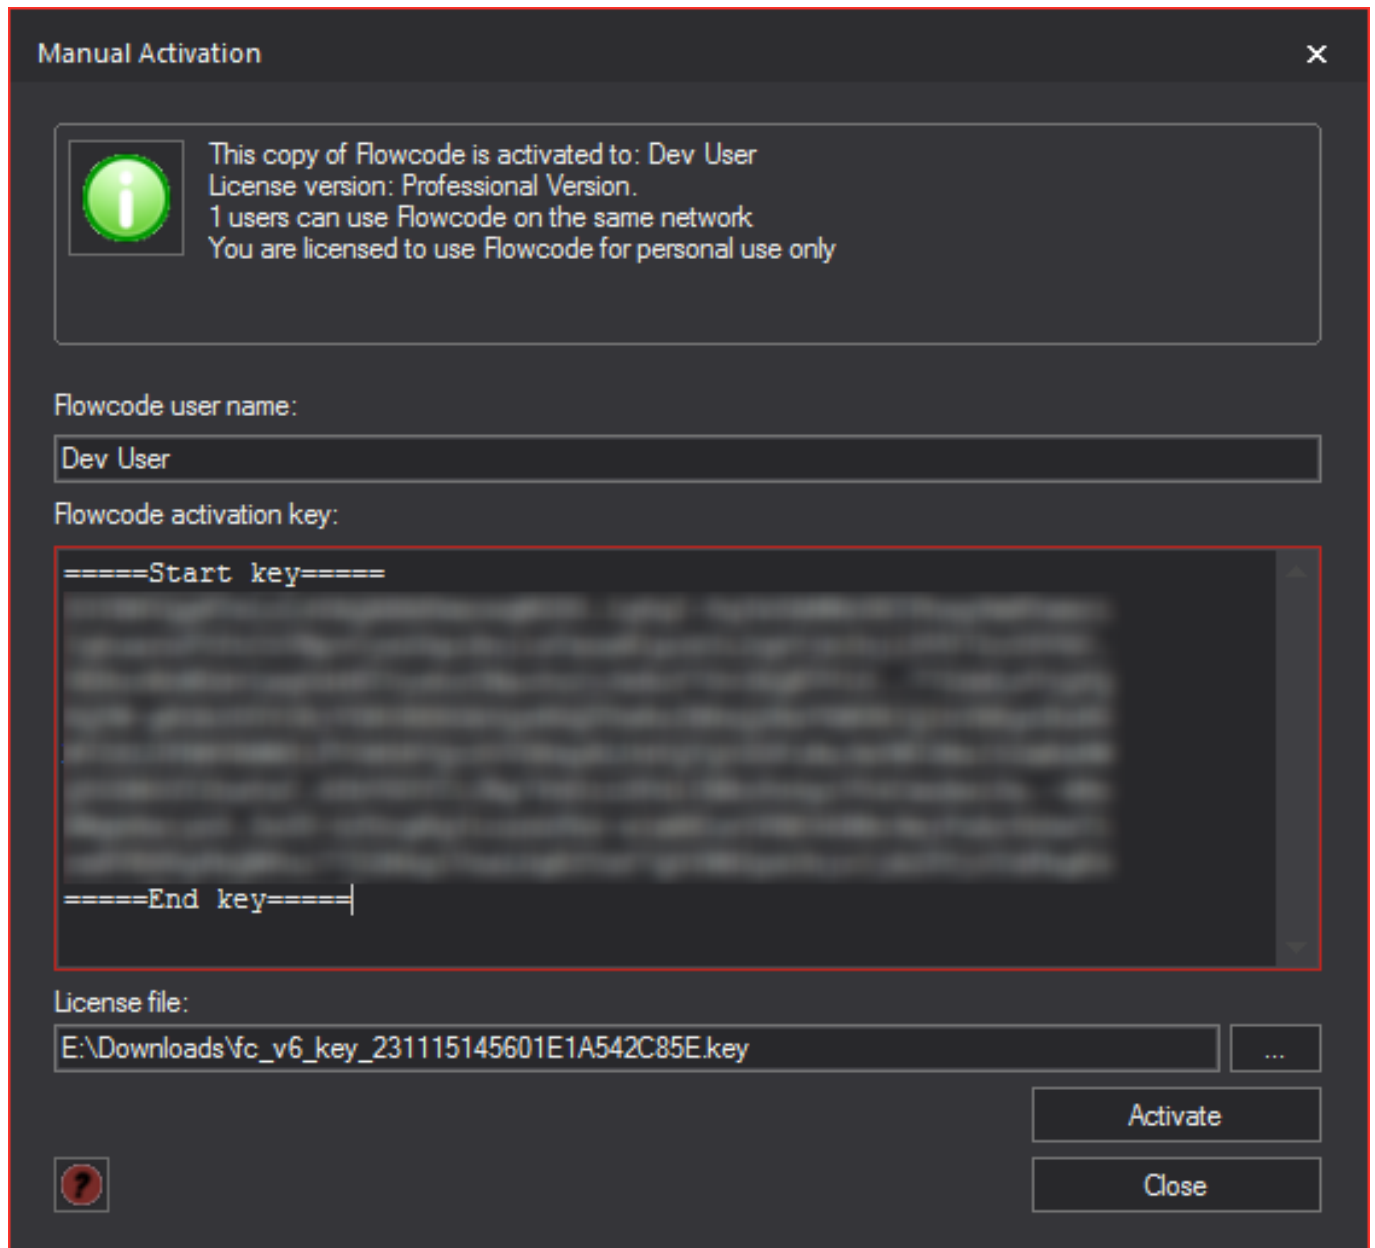

7) Select the “Manual Activation”

Flowcode

7) Enter the **Flowcode Username** at the top, copy and paste the entire key (including (=====Start key===== and =====End key=====) into the box provided

The screenshot shows a 'Manual Activation' dialog box with a dark background. At the top left is a green information icon. To its right, the text reads: 'This copy of Flowcode is activated to: Dev User', 'License version: Professional Version.', '1 users can use Flowcode on the same network', and 'You are licensed to use Flowcode for personal use only'. Below this is a text input field for 'Flowcode user name:' containing 'Dev User'. Underneath is another text input field for 'Flowcode activation key:' containing a long alphanumeric key with '=====Start key=====' at the beginning and '=====End key=====|' at the end. Below the key field is a text input field for 'License file:' containing 'E:\Downloads\fc_v6_key_231115145601E1A542C85E.key' and a browse button '...'. At the bottom right are two buttons: 'Activate' and 'Close'. At the bottom left is a help icon (a red circle with a white question mark).

8) Click the “...” button and point the dialogue box at the “**Licence Key File**” downloaded earlier.

9) Click the “Activate” button

Flowcode

Flowcode should restart and the new licence applied.
