VPIC not loading directly from Main Program

Unfortunately due to issues with Windows 7 the VPIC software will not load directly from within the main course.

The simple work around is to load the VPIC software manually and then load the programs from within VPIC using File >> Open

All the tutorial files all located:

c:\ >> Program Files >> Matrix Multimedia >> ASM4PICsV4 >> course >> VASMprogs

This is the default location, if you have a custom install location, this will be different.

Unique solution ID: #1033
