

Flowcode

Running Flowcode with Arabic Language - Flowcode v4

- Download the zip file attached
- Unzip (extract these files to a suitable location – eg Desktop/My Documents)
- Double-click on the “fc_hklm.reg” icon and OK any warning messages.
- Copy the FlowAR.dll into your Flowcode directory (where Flowcode.exe is located).
- Run Flowcode
- Navigate to View >> Global Properties
- Tick the override language box
- Scroll down to find Arabic.
