ED-WDM: WDM COMPONENTS

LABORATORY MANUAL

1. INTRODUCTION	1
2. NOTES ON WDM SYSTEMS AND THEIR COMPONENTS	2
2.1 Introduction	2
2.2 WDM systems	2
2.2.1 The General Principle of WDM	2
2.2.2 Dense WDM (DWDM) Systems	4
2.2.3 Coarse WDM (CWDM) Systems	5
2.2.4 1310nm / 1550nm duplex systems	5
2.3 Fused Biconical Taper (FBT) Fibre Components	6
2.3.1 The optical waveguide directional coupler	6
2.3.2 Singlemode fused fibre couplers	10
2.4 Micro & Bulk Optic Components	14
2.4.1 Introduction	14
2.4.2 WDM devices (DWDM & CWDM)	15
2.4.3 Isolators	16
2.4.4 Circulators	16
2.4.5 Fibre Bragg Gratings	18
2.5 Optical Connectors	19
2.6 Practical Component Packages	21
3. APPARATUS DESCRIPTION	22
3.1 Electronics Rack	22
3.1.1 Power/ communications module	23
3.1.2 Laser Diode Modules (DWDM)	23
3.1.3 Power Meter Module	23
3.2 Optical Components Rack	24
3.2.1 Terminations Module	24
3.2.2 Passive Component Modules	24
3.3 Use of Optical Fibres	24
4. EXPERIMENTAL EXERCISES (WDM COMPONENTS)	26
4.0 Laser Characterisation	26
4.1 Characterising the FBT 50/50 Coupler and establishing the Basic Measurement Set-Up	26
4.1.1 FBT Coupler	26
4.1.2 Using the FBT Coupler as part of the Measurement System	27
4.2 Connectors and Terminations	29
4.3 FBT Coupler	31
4.4 FBT WDM	32
4.5 Isolator	33
4.6 Circulators	34
4.7 DWDM Modules	36
Exercise	37
4.8 Bragg Grating	38
REFERENCE	40

Table of Contents

ED-WDM: DWDM SYSTEMS

LABORATORY MANUAL

1. INTRODUCTION	1
2. APPARATUS DESCRIPTION	2
2.1 <i>Electronics Rack</i>	2
2.1.1 Laser Diode Modules (DWDM).....	3
2.1.2 Photoreceiver Module	3
2.1.3 VOA Module.....	3
2.2 <i>Optical Components Rack</i>	4
2.2.1 Passive Component Modules.....	4
2.3 <i>Use of Optical Fibres</i>	4
2.4 <i>Additional required equipment</i>	5
3. EXPERIMENTAL EXERCISES (DWDM COMPONENTS)	6
3.1 <i>Variable Optical Attenuator (VOA)</i>	6
3.2 <i>DWDM Characterisation (Optional)</i>	6
4. EXPERIMENTAL EXERCISES (DWDM SYSTEMS)	7
4.1 <i>Assembly, Investigation and Characterisation of DWDM Systems</i>	7
4.2 <i>Examination of Channel ADD function followed by a Channel DROP using the DWDMs as Add/Drop Multiplexers</i>	10

Table of Contents

ED-WDM: 1310/1550 WDM

LABORATORY MANUAL

1. INTRODUCTION	1
2. NOTES ON OPTICAL FIBRE CHARACTERISTICS	2
2.1 Introduction	2
2.2 Optical fibre for communications systems	2
2.3 Attenuation in fibre optic channels	3
2.3.1 Attenuation in optical fibre	3
2.3.2 Fibre attenuation mechanisms	3
2.3.3 The wavelength dependence of attenuation in silica fibre	5
2.4 Dispersion in optical fibre links	6
2.4.1 Introduction	6
2.4.2 Physical origins of chromatic (intramodal) dispersion	7
2.4.3 The total magnitude of pulse spreading in single mode optical fibres	9
2.4.4 Pulse spreading in multimode optical fibre - intermodal dispersion	11
3. APPARATUS DESCRIPTION	12
3.1 Electronics Rack	12
3.1.1 Laser Diode Module (CWDM)	13
3.1.2 Photoreceiver Module	13
3.2 Optical Components Rack	14
3.2.1 Passive Component Modules	14
3.2.2 Optical Fibre Reel	14
3.3 Use of Optical Fibres	14
3.4 Additional required equipment	15
4. EXPERIMENTAL EXERCISES (1310/1550 WDM COMPONENTS)	16
4.1 Component Characterisation	16
5. EXPERIMENTAL EXERCISES (1310/1550 WDM SYSTEMS)	17
5.1 Demonstration and Characterisation of a 1310/1550nm WDM System	17
5.2 Characterisation of a 1310/1550nm WDM bi-directional system	18
5.3 Examination of Crosstalk on Weak Signals	19
6. EXPERIMENTAL EXERCISES (FIBRE CHARACTERISTICS)	20
6.1 Fibre Attenuation	20
6.2 Fibre Length	21
6.2.1 Theory	21
6.2.2 Measurement of Fibre Length with BER(COM) – Method 1	21
6.2.3 Measurement of Fibre Length with BER(COM) – Method 2	23
6.2.4 Estimation of Fibre Group Refractive Index at 1310nm	23
6.2.5 Fibre Attenuation Co-efficient	24
6.3 Chromatic Dispersion	25
6.3.1 Background on Ring Resonators	25
6.3.2 Background on Chromatic Dispersion Measurement	26
6.3.3 Dispersion Measurements	27
REFERENCES	29

ED-WDM: BRAGG GRATINGS

LABORATORY MANUAL

1. INTRODUCTION	1
2. NOTES ON FIBRE BRAGG GRATINGS	2
3. APPARATUS DESCRIPTION	3
3.1 <i>Electronics Rack</i>	3
3.1.1 TEC Driver Module.....	3
3.2 <i>Optical Components Rack</i>	4
3.2.1 Tuneable Bragg Grating Module.....	4
3.3 <i>Use of Optical Fibres</i>	4
4. EXPERIMENTAL EXERCISES (BRAGG GRATINGS)	5
4.1 <i>Bragg Grating</i>	5
4.2 <i>Tuneable Bragg Grating</i>	6

Table of Contents

ED-WDM SERIES

GENERAL APPENDICES

APPENDIX 1: LASER SAFETY	1
APPENDIX 2: ITU CHANNEL DESIGNATIONS	2
APPENDIX DB: DECIBELS.....	3
1. Working with Decibels (dB).....	3
2. Working with dBm	4
APPENDIX WOF: WORKING WITH OPTICAL FIBRES	5
1. General.....	5
2. Use of Optical Connectors.....	5
APPENDIX MOD: MODULATION SCHEME FOR LASER DRIVERS.....	8
APPENDIX BER: BER(COM)	9
1. INTRODUCTION	9
2. THEORY	10
2.1 Threshold Detection and BER.....	10
2.2 BER, SNR, Sensitivity and Power Penalties	13
2.3 Eye Diagrams	15
2.4 Measurement and estimation of BER.....	19
3. APPARATUS DESCRIPTION	20
4. OPERATING INSTRUCTIONS	21
4.1 Operation of the PRBS to generate Eye Diagrams.....	21
4.2 Acquisition of Signal Variation Histograms, Noise Variance Q-factor and BER	21
5. EYE DIAGRAMS FOR THE OUTPUT OF THE PRBS GENERATOR.....	25
6. FIBRE LENGTH MEASUREMENTS	26
6.1 Theory	26
6.2 Measurement of Fibre Length with BER(COM) – Method 1.....	26
6.3 Measurement of Fibre Length with BER(COM) – Method 2.....	27
APPENDIX: SOFTWARE - ED-WDM V1.6	29
A: Software Installation.....	29
B: Potential Problems.....	29
APPENDIX LVI: DFB LASER CHARACTERISATION	30
A. DWDM DFB Laser Characterisation (LVI vs. Temperature).....	30
B. Using L-V-I PLOT.....	31
C. Analysis.....	33
APPENDIX λ -SCAN: AUTOMATED WAVELENGTH SCAN	34
A. Device Wavelength Characterisation (Spectral Characterisation).....	34
B. Using WAVELENGTH SCAN.....	35
APPENDIX DISPERSION_TEST: FIBRE LENGTH & CHROMATIC DISPERSION MEASUREMENT SETUP.....	37
A. Modulation of lasers with an impulse response	37
B. Using DISPERSION TEST.....	37
